Rationale for Treatment Admission:

Adrian is a 47 female who identifies as male diagnosed with F32.1 Major depressive disorder, Single episode, Moderate, F41.1 Generalized anxiety disorder, F10.20 Alcohol use disorder, Moderate, F14.20 Cocaine use disorder, Moderate. Client is experiencing severe symptoms of depression, anxiety, and disordered eating, as evidenced by frequent panic attacks, suicidal ideation, and significant weight loss. These symptoms are impacting the ability to function in daily life and are putting

client at risk for further deterioration. Client has tried outpatient therapy and medication management in the past, but these interventions have not been effective in adequately addressing her symptoms. Client has not shown significant improvement despite consistent treatment efforts, indicating the need for a higher level of care. Client has a history of self-harm and suicidal ideation, and has made multiple suicide attempts in the past. Client is currently expressing thoughts of hopelessness and worthlessness but has no plan. These safety concerns necessitate a more intensive level of care to ensure her safety and well-being. Overall, based on the severity of Client's symptoms, lack of improvement with previous treatments, safety concerns, lack of support, and functional impairment, a PHP level of care is clinically justified by locus standards to provide with the intensive treatment and support the client needs to address mental health concerns effectively.

Step Into Recovery Centers INC Group Confidentiality

To reinforce the feelings of closeness and willingness to share with others your feelings, thoughts, and consequences of your dependency, confidentiality is a must in group therapy. Use this as your golden rule: **What is said in Group, stays in Group**
To break this rule violates the trust of the total group and the effectiveness of group therapy is lost.

The following guidelines will help you maintain this rule:

1. Group issues are not discussed with others outside your group.
2. Do not discuss group issues with your roommate unless he/she is in your group.
3. Do not discuss at any outside meetings or places where others may overhear you.

Your group therapists have the same responsibilities for group confidentiality as you, with the exception that your therapists share group issues and your participation in the group process with other staff members. This is a vital part of the staff team's approach to assist you in your recovery.

The staff values your confidentiality so highly that anyone who breaks confidentiality - whether to another patient of Step Into Recovery Centers INC or to family, significant others, etc., may be subject to discharge from this program.
